DETAILED ACTION

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the essential difference from the prior art is applying a spatial transformation to the level set contours to expand the level set contours to a lower level and using the expanded contours to perform motion detection analysis for subsequent pairs of sequential images. These features in combination with the other elements of the claim and the base claim are not disclosed or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Pertinent Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Lee et al., U.S. Patent Application Publication No. 2001/0048753 discloses the concept of using expanded contours for motion detection analysis for subsequent images (figure 10).
- b. Suri et al., U.S. Patent No. 6,842,638 discloses expanding level set contours for estimating boundaries in medical images (col. 20, lines 11-22).
